Placa Cuadrada 2D

Puntos

```
Point(0)={0,0,0};

Point(1)={1,0,0};

Point(2)={1,1,0};

Point(3)={0,1,0};

Point(4)={0,0,0.1};

Point(5)={1,0,0.1};

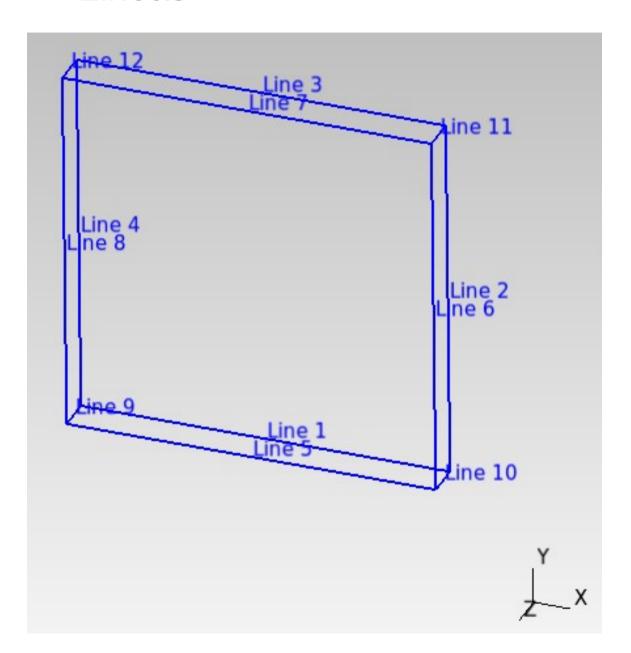

Point(6)={1,1,0.1};

Point(7)={0,1,0.1};
```

```
Point 3
Point 7
Point 0
Point 4
```

Lineas

```
Line(1)=\{0,1\};
Line(2)=\{1,2\};
Line(3)=\{2,3\};
Line(4) = \{3, 0\};
Line(5)=\{4,5\};
Line(6)=\{5,6\};
Line(7) = \{6, 7\};
Line(8)=\{7,4\};
Line(9)=\{0,4\};
Line(10)=\{1,5\};
Line(11)=\{2,6\};
Line(12)=\{3,7\};
```

Superficies

```
Curve Loop(1)={1,2,3,4};

Surface(1)={1};

Curve Loop(2)={5,6,7,8};

Surface(2)={2};

Curve Loop(3)={9,5,-10,-1};

Surface(3)={3};

Curve Loop(4)={10,6,-11,-2};

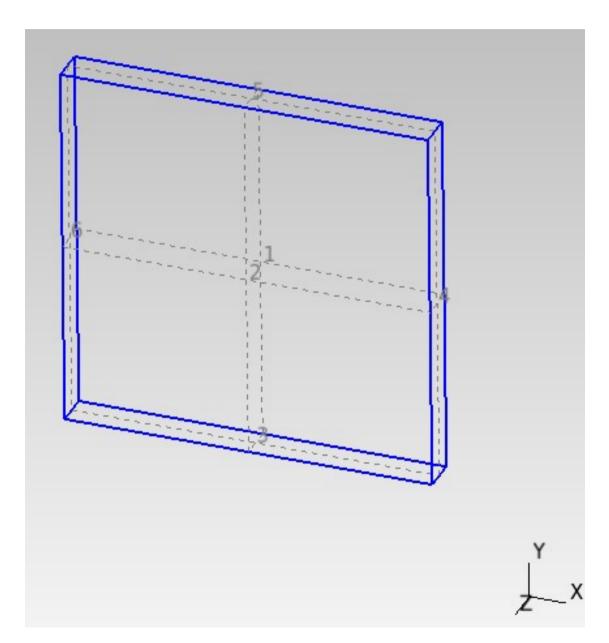

Surface(4)={4};

Curve Loop(5)={11,7,-12,-3};

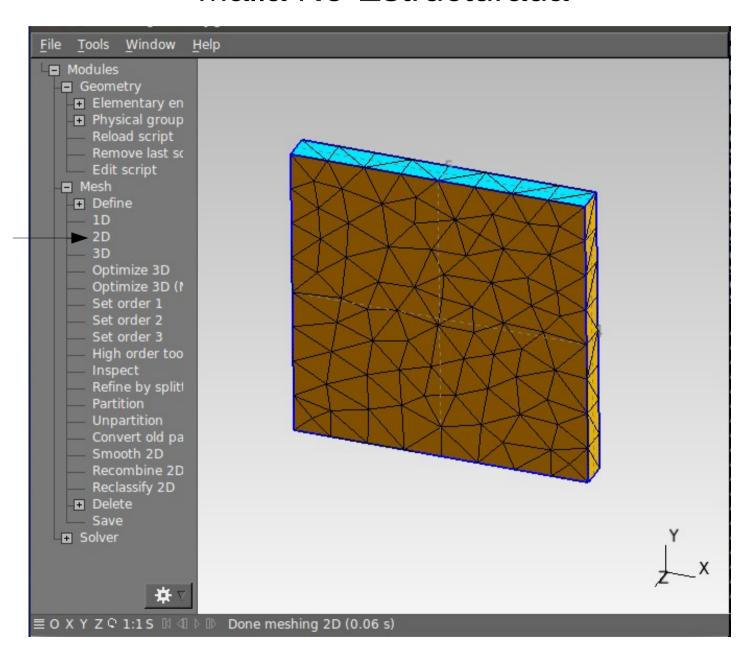

Surface(5)={5};

Curve Loop(6)={12,8,-9,-4};

Surface(6)={6};
```

Malla No-Estructurada

Malla Estructurada

Numero de nodos sobre las lineas (Se deben incluir todas laslineas)

Volúmenes conformados por 6 superficies (Un bloque como estos para cada volumen)

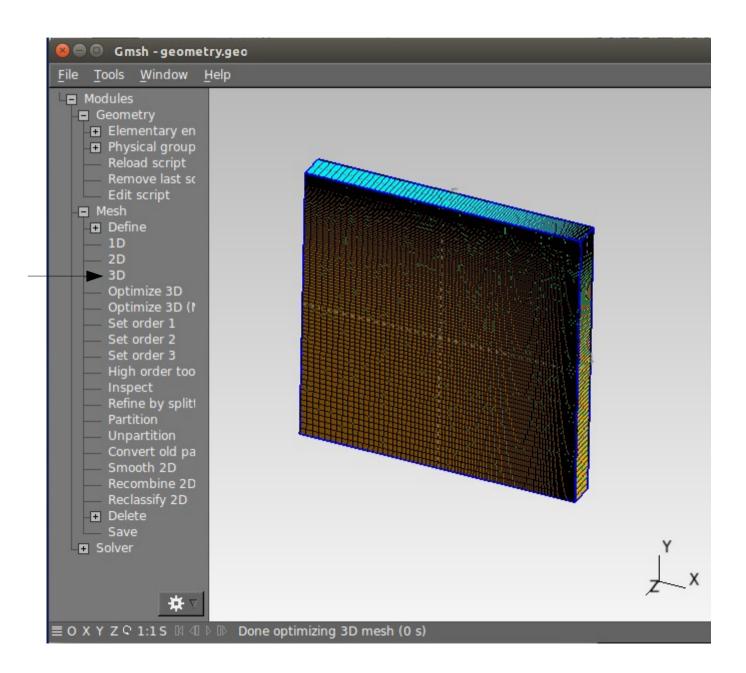

"Transfinite Volume" con todos los volumenes Coherence para generar una malla continua

Nombre de los parches donde se aplicaran las condiciones de frontera

Siempre se debe agregar con todos los volúmenes para que openFoam lo importe

```
Transfinite Line{1,-3,5,-7}=100 Using Progression 0.98;
Transfinite Line{2,-4,6,-8}=100 Using Progression 0.98;
Transfinite Line{9,10,11,12}=2 Using Progression 1;
Transfinite Surface{1,2,3,4,5,6};
Surface Loop(1)={1,2,3,4,5,6};
Recombine Surface{1,2,3,4,5,6};
Volume(1)={1};
Transfinite Volume {1};
Coherence:
Physical Surface("arriba") = {5};
Physical Surface("abajo") = {3};
Physical Surface("derecha") = {4};
Physical Surface("izquierda") = {6};
Physical Surface("frontAndBack") = {1,2};
Physical Volume("volume")={1};
```

Malla Estructurada

gmshToFoam

- Exportar como file.msh (versión 2 ASCII) en la carpeta del caso (donde estén las carpetas "system" y "constant").
- Ejecutar el comando "gmshToFoam file.msh".
- Si es malla 2D, editar el tipo de borde del parche "frontAndBack" del archivo "constant/polyMesh/boundary", cambiando "patch" por "empty".

Disco_{2D}
